

The Open Web Application Project (OWASP)

OWASP is a not-for-profit organization with a mission to make security visible to everyone and to focus on improving the security of software.

OWASP organizes its resources around projects. Check out a few of the projects that are currently running: https://www.owasp.org/index.php/Category:OWASP_Project#tab=Project_Inventory.

We will explore in more depth the top 10 project later in this course.
